

Pedro Augusto

Uberlândia, MG 38400273 | +55 34 99686 4021 | cactusrustinc@gmail.com

Professional Summary

My name is Pedro, and I am from Uberlândia. I was born in 2005 and have worked professionally as a designer for four years. I have been passionate about art since childhood. I started drawing at the age of one and, as a child, developed an interest in a range of creative disciplines - audiovisual work, music, instruments, acting, dance, photography, books and poetry - which I continue to pursue.

As an adult, I work as a Creative Designer focused on web design (HTML, CSS, SEO, AEO, GEO, performance and accessibility), editorial design (layout and Gestalt principles), and animation (2D, 3D and motion). I am also a multi-instrumentalist (string and percussion instruments), music producer, composer and writer. Over many years, I built a complete studio in my bedroom through my own work.

At Martins Distribuições, I work as a Web Designer, producing enriched content for products, processing carousel images for every product added since 2024 - approximately 20,000 image treatments across B2C and B2B - and managing initiatives to improve the speed and effectiveness of the design team's workflow in Digital Growth Product Management. This work includes structuring more efficient HTML code, introducing AI tools (Claude, OpenAI and Gemini) to support the team, and producing review and evaluation documents, especially for image-processing standards.

I specialize in Adobe Creative Cloud (Photoshop, Illustrator, InDesign, After Effects, Premiere and related tools), have completed more than 12 courses in the field, and continue to build expertise in search, UX, audio processing and process management.
